

### **Twin Cities Campus**

## **Geography B.S.**

*Geography, Environment, Society*

### **College of Liberal Arts**

- Program Type: Baccalaureate
- Requirements for this program are current for Fall 2022
- Required credits to graduate with this degree: 120
- Required credits within the major: 44 to 59
- Degree: Bachelor of Science

From climate to culture, urban settings to rural land uses, human society to environment, the B.S. in Geography provides students with the tools to understand our world, its processes, and all of its inhabitants. The Geography B.S., with its emphasis on the application of scientific knowledge and critical thinking to a wide variety of contemporary geographic problems, is an exceedingly relevant degree. Students specialize in one of two areas, Environmental Geography or Geographic Information Science (GIS). In Environmental Geography students study natural environments and systems, both in themselves and as they relate to human beings, including weather and climate patterns, climate change, plant and animal distributions, forest fires, and natural resources such as water, wind, and forestland. GIS collects geographic information, creates spatial analytical methods, and uses cutting-edge technologies to advance our knowledge of natural and societal phenomena and processes across space and time. Environmental Geography and GIS are highly employable fields that offer opportunities to study some of the most urgent problems facing society today: How do humans affect the climate? Why are climate-change impacts not the same everywhere? What places are most prone to fire, flooding and other hazards, and why? In a city with many different people and many different needs, where is the best place to locate a new hospital or school? How should electoral boundaries be drawn to ensure fair representation? How can we ensure that everyone has access to the goods and services they need or reduce spatial disparities? A B.S. in Geography provides the fundamental knowledge and analytical skills to tackle these and many other fundamentally geographic questions.

The B.S. in Geography directly benefits from being a science field located in a liberal arts department. As noted by the U.S. National Academies, the liberal arts are of increasing importance in scientific and technical fields because they train students to think broadly and in an integrative way. Geography majors at the University of Minnesota report high rates of satisfaction with the major. The B.S. in Geography supports students in connecting the sciences and the liberal arts by including a broad palette of coursework in Geography such as urban geography, economic geography, and social-cultural geographies. The capstone experience, taken near the end of the student's studies, readies students to move forward by encouraging them to synthesize what they have learned.

A wide variety of career options are open to students with a B.S. in Geography. Local, regional, and federal agencies seek geographers for city and regional planning, natural resource management, transportation, and community development positions. Private industry consulting, environmental and marketing firms, the non-profit sector, and local, national, and transnational non-governmental organizations seek the geographic skills taught in the Geography B.S. Many Geography undergraduate majors obtain careers in education and many go on to graduate school.

### **Program Delivery**

This program is available:

- via classroom (the majority of instruction is face-to-face)

### **Admission Requirements**

For information about University of Minnesota admission requirements, visit the [Office of Admissions website](#).

### **General Requirements**

All students are required to complete general University and college requirements including writing and liberal education courses. For more information about University-wide requirements, see the [liberal education requirements](#). Required courses for the major or minor in which a student receives a D grade (with or without plus or minus) do not count toward the major or minor (including transfer courses).

### **Program Requirements**

Some GEOG 5xxx-level courses are graduate-level courses and will require departmental consent.

A given course may only count towards one major requirement.

See major advisor for final approval of individual program.

At least 14 upper-division credits in the major must be taken at the University of Minnesota Twin Cities campus.

Students may earn up to one undergraduate degree in the geography program: a BA, a BS, or a minor. Students in the Geography BS may also seek a major or minor in urban studies, or the minor in public health. Students who declare the Geographic Information Science sub-plan in the BS may not minor in Geographic Information Science.

All incoming CLA freshmen must complete the First-Year Experience course sequence.

All students must complete a capstone in at least one CLA major. The requirements for double majors completing the capstone in a different CLA major will be clearly stated. Students must also complete all major requirements in both majors to allow the additional capstone to be waived. Student completing an addition degree must complete the capstone in each degree area.

### Ways of Knowing

The Ways of Knowing requirement provides a theory-intensive overview of the discipline. Students are encouraged to take 3-5 of their breadth courses and electives before taking their Ways of Knowing course.

Take exactly 1 course(s) totaling 3 - 4 credit(s) from the following:

- GEOG 4001 - Modes of Geographic Inquiry (3.0 cr)
- GEOG 4002W - Environmental Thought and Practice [WI] (3.0 cr)

### Capstone

The Capstone may include data collection, reading, reflection, collaboration, and interpretation, and ends with writing a document. As the culmination of undergraduate training, each project develops from an interest or specialization deriving from previous courses.

Students who double major and choose to complete the capstone requirement in their other major may waive the geography BS capstone, and they do not need to replace the 2 credits.

Take exactly 1 course(s) totaling 2 - 4 credit(s) from the following:

#### Option 1: Seminar

Note: this option is not available every semester.

- GEOG 3985W *{Inactive}*[WI] (4.0 cr)
