

Duluth Campus

Physics B.A.

UMD-Physics & Astronomy

Swenson College of Science and Engineering

- Program Type: Baccalaureate
- Requirements for this program are current for Spring 2022
- Required credits to graduate with this degree: 120
- Required credits within the major: 55 to 82
- Degree: Bachelor of Arts

The bachelor of arts degree in physics is a liberal arts degree that allows considerable freedom in the planning of upper level courses and can easily be combined with other majors and interests. The physics courses emphasize conceptual foundations, problem-solving skills, and experimental techniques.

Honors requirements: To graduate with honors, students must complete and present a research project, and are suggested to maintain a GPA above 3.50 overall and in the major. They are also expected to attend department colloquia. Interested students should contact the physics honors program coordinator.

Program Delivery

This program is available:

- via classroom (the majority of instruction is face-to-face)

Admission Requirements

For information about University of Minnesota admission requirements, visit the [Office of Admissions website](#).

General Requirements

The Board of Regents, on recommendation of the faculty, grants degrees from the University of Minnesota. Requirements for an undergraduate degree from University of Minnesota Duluth include the following:

1. Students must meet all course and credit requirements of the departments and colleges or schools in which they are enrolled including an advanced writing course. Students seeking two degrees must fulfill the requirements of both degrees. However, two degrees cannot be awarded for the same major.
2. Students must complete all requirements of the [Liberal Education Program](#).
3. Students must complete a minimum of 120 semester credits.
4. At least 30 of the last 60 degree credits earned immediately before graduation must be awarded by UMD.
5. Students must complete at least half of their courses at the 3xxx-level and higher at UMD. Study-abroad credits earned through courses taught by UM faculty and at institutions with which UMD has international exchange programs may be used to fulfill this requirement.
6. If a minor is required, students must take at least three upper division credits in their minor field from UMD.
7. The minimum cumulative UM GPA required for graduation will be 2.00 and will include only University of Minnesota coursework. A minimum UM GPA of 2.00 is required in each UMD undergraduate major and minor. No academic unit may impose higher grade point standards to graduate.
8. Diploma, transcripts, and certification will be withheld until all financial obligations to the University have been met.

Program Requirements

For students not choosing to complete an optional subplan

Required credits to graduate with this degree: 120

Required credits within the major: 55

1. A subplan is not required.
 - a. Students interested in broadening analytical thinking through computer science may consider the Computational Physics subplan (see SCSE Advising to declare this subplan).
 - b. Students interested in develops skills in analytical thinking, and data analysis are encouraged to add a Business Administration minor (see LSBE Advising to declare this minor).
 - c. Student who do not chose a subplan are required a second field of study (either a minor or another major).

2. Students interested in teaching 9-12 physics may enroll concurrently in secondary licensure requirements in the Department of Education and apply for admission to the Secondary Teacher Education Program.

3. Taking the "Honors" General Physics I course and General Physics II is recommended but not required for physics majors.

Learning In Community (1 cr)

Requirement will be waived for transfer students with at least 30 credits taken post high school, for UMD students who started in a UMD collegiate unit where this is not required, and upon request for first-year students with 30 PSEO credits.

Program Sub-plans

A sub-plan is not required for this program.

Computational Physics

Required credits to graduate with this degree: 120

Required credits within the major: 77

This sub-plan is ideal for students who seek a strong grounding in physics and the computational techniques used in physics research. Computational physics connects physics, computer science, and applied mathematics to provide scientific solution to realistic and other complex problems. Students who will find this sub-plan valuable are interested in moving directly into a quantitative career after graduation and students double majoring with another science or engineering major and considering graduate school.

Business Administration

Required credits to graduate with this degree: 120

Required credits within the major: 82

By adding a subplan in Business Administration, students can apply practical computing, data analysis, and logical thinking learned through physics to enhance their foundation of business knowledge.

An overall UM GPA of 2.60 is required for automatic admission to this specialty, along with completion of the Pre-Sub-plan core.
