The theatre arts curriculum is designed to ensure that students:
* understand the theories and process of theatrical production;
* are able to apply theories and skills learned in the classroom to the practice of theatre both through discipline productions and other venues;
* gain the physical and intellectual skills necessary to embody character, interpret a play, or envision the visual and aural elements of the world of the play;
* are able to analyze a theatrical text so that they may, in turn, conceptualize and execute its design and performance;
* learn to collaborate as a team in the production of theatre and, through critical thinking, learn how to solve the problems that must be addressed throughout the process;
* develop competence in the technologies necessary to the design and production of theatre;
