## Program Requirements

**Plan B:** Plan B requires 31 major credits and up to null credits outside the major. The final exam is written and oral. A capstone project is required.

**Capstone Project:** Students must complete 6 credit hours of capstone project coursework supervised by a faculty member.

The final examination for the Capstone Project may be oral, written, or both. The format of the final exam is decided between the student, the adviser, and the director of graduate studies, and is based on what is most appropriate for the students project. The final oral examination, if it is used, is a closed examination open only to the final oral examination committee and the student.

This program may be completed with a minor.

Use of 4xxx courses towards program requirements is not permitted.

The program requires a total of 31 credits consisting of 6 credits each from the three emphasis areas: statistics, algorithms, and infrastructure and large scale computing; 6 credits in approved electives or in a minor; 1 credit of research colloquium; and 6 credits for the capstone project.
