Architecture B.S.

School of Architecture

College of Design

- Program Type: Baccalaureate
- Requirements for this program are current for Fall 2016
- Required credits to graduate with this degree: 120
- Required credits within the major: 98 to 99
- Degree: Bachelor of Science

The Bachelor of Science (with a major in architecture) is a pre-professional architecture degree program that offers studio-based design education and a rigorous program of history/theory and building technology courses. The program exposes students to the formal, socio-cultural, material, environmental, and historical factors that shape built environments. The B.S. program fosters a sense of stewardship for local and global built environments by providing opportunities for students to engage with College of Design faculty and research centers, to enroll in service learning courses, and to study abroad. Design education in the B.S. program is structured around five sequential semester-long design studios. Each one is a focused study in one of architecture's core areas: material assemblies, the designed environment, program and typology, metropolitan design, and advanced design. Through hands-on making and complementary courses, students demonstrate how these core areas affect formal, spatial, and experiential qualities of architectural space.

B.S. students develop visual literacy through design thinking and the development of design processes in design studios by engaging spatial representation in drawing and computational courses, by researching historical precedents and theoretical texts in history and theory seminars, and by exploring concepts of sustainability and resilience in technology courses. The B.S. program fosters a sense of stewardship of local and global built environments by providing opportunities for students to engage with College of Design faculty and research centers, to engage in design-build activities, to enroll in service learning courses, and to study abroad.

Students are eligible to apply to the B.S. degree program from within the College of Design after completing all required first-year courses. Admissions are highly competitive, with a portfolio requirement as part of the application process. Students in the B.S. will take five required 6-credit design studios, a sequence of history/theory and building technology courses, and 9 credits of upper-level architecture electives. Graduates of the B.S. are well prepared to apply to the second year of the School of Architecture's Master of Architecture graduate program; Master of Science degree programs in Sustainability, Heritage Preservation and Conservation, and Metropolitan Design; as well as other graduate degree programs at peer institutions, per their admissions requirements.

Program Delivery

This program is available:

- via classroom (the majority of instruction is face-to-face)

Admission Requirements

Students must complete 12 credits before admission to the program.

Freshman and transfer students are usually admitted to pre-major status before admission to this major

A GPA above 2.0 is preferred for the following:

- 2.80 already admitted to the degree-granting college
- 2.80 transferring from another University of Minnesota college
- 2.80 transferring from outside the University
