Philosophy Department

College of Liberal Arts

- Required credits within the major: 30 to 39
- Degree: Bachelor of Arts

If you have ever pondered, "Why am I here?" or "What is the meaning of life?" then you have already thought about philosophy. Philosophy poses questions about human endeavors and examines our basic assumptions about everything we think we know. It takes on challenging issues that sometimes defy resolution and trains the brain to think in a rigorous and analytic way about all the possible answers and what's at stake. Philosophy is not just a subject matter but a way of thinking.

In your philosophy courses, you will learn about the way that people throughout history have engaged in this kind of thinking with questions such as "Can I really trust my senses to tell me about reality?", "Is anything really morally right or wrong or is it all just relative?", "Do scientific theories tell us the truth about the world or are they tools that are useful for certain purposes?" and "Are some societies more just than others?". You will discover that thinking about these questions with an open mind is deeply satisfying. Philosophical thinking also contributes to a worthwhile life; in the words of Socrates "the unexamined life is not worth living".

Of course, life isn't all about having fun thinking. Philosophy is also much more practical than you might think! Because philosophy is so far-reaching, the method it uses for study enhances the study of other fields such as art, math, science, language, and law with tremendous success. It is a great complement to other majors as a second major or a minor. You can find details about good combinations on our website. Also, studying philosophy is a fantastic way to hone your critical thinking and analytic writing skills. You'll learn two types of critical thinking: First, a method for rigorous analysis of arguments. Second, a habit of asking penetrating questions about the hidden assumptions of any position, ideology or practice. You will develop your capacities to conceive of alternative assumptions, evaluate which ones are best and determine where they lead. You'll learn to write papers that clearly demonstrate these skills.

And finally, you can reassure your parents about your choice of philosophy with the fact that the skills of critical thinking and analytic writing are highly desirable and sought by graduate programs and employers. Evidence of this includes:
PHIL majors rank first among all majors in law school acceptance rate: 82.4%.
PHIL majors rank first among all majors in verbal and analytic sections of the GRE (and first among humanities majors in the quantitative section)
PHIL majors score higher on the Graduate Management Admissions Test (the test that most MBA programs require) than students in any business major (management, finance, accounting, marketing, etc.)
PHIL majors' salaries increase more over 10 years than most other majors, including marketing and accounting (The Wall Street Journal).
"The present value of the extra earnings that graduates in humanities majors can expect over their lifetime is $444,700 for English majors, $537,800 for history majors, and $658,900 for philosophy majors" (Forbes).

Information current as of March 29, 2024

CLA BA degrees require 4 semesters or the equivalent of a second language.

CLA degrees require students to complete 48 credits of upper division coursework taken at the 3xxx, 4xxx, or 5xxx level. For a BA at least 18 of the 48 upper division credits must be outside of the major. For some specific majors, there are exceptions to this requirement.

This program requires 18 upper division credits outside the major. See your advisor for a list of courses that can or cannot be used to meet this requirement.

A philosophy major program requires 30 credits, at least 11 of which must be upper division philosophy credits completed at the University of Minnesota - Twin Cities campus. No more than 8 credits of PHIL 1xxx may count toward the degree, and at least two 3-or-more-credit courses must be PHIL 4xxx or higher. Students who double-major and choose to complete the senior project in their other major are still responsible for taking 30 total PHIL credits. Students may earn a BA or a minor in philosophy, but not both.

All incoming CLA freshmen must complete the First Year Experience course sequence.

Aesthetics

Aesthetics is the philosophical study of the arts, especially in regard to such questions as: What is art, and how is it connected to the world? What is the role of beauty in art? Are there objective truths about artistic value? Are there situations in which artistic activity should be restricted or suppressed? Study of aesthetics pairs well with majors in the arts and in art history, as well as in literature and such subjects as sociology, anthropology, psychology and education.

Practical/Applied Ethics

Many of the questions we confront in our personal, professional, and civic lives are questions of ethics. Should I buy organically produced food in order to minimize harms to the environment? Should I support affirmative action policies in education or the workplace? Is mass incarceration unjust? Why? Study of ethics pairs well with students who anticipate pursuing professions such as business, education, human resources, law, and medicine.

Can a contradictory statement be true? Could I be wrong about most everything I believe? You will find that some authors have ideas different from yours, while others share familiar ideas. Comparing the different with the familiar gives you the opportunity to notice, understand, and evaluate your own assumptions.

Logic (and its philosophy) studies the differences between truth and falsity, good and bad arguments, correct and incorrect reasoning, necessity and possibility, and the finite and the infinite. In logic courses we introduce precise symbolic methods for representing various kinds of reasoning, and we develop systematic tools for differentiating the good arguments from the bad. What makes a claim "scientific"? How do scientists know when they have a good theory? How can we make informed evaluations of scientific claims in order to participate knowledgeably in society and make good choices in everyday life? Philosophy of science courses address these and other questions about the nature of scientific reasoning. This includes exploring characteristics of
