Twin Cities Campus

Statistical Practice B.A.

Statistics, School of

College of Liberal Arts

- Program Type: Baccalaureate
- Requirements for this program are current for Spring 2018
- Required credits to graduate with this degree: 120
- Required credits within the major: 52 to 53
- Degree: Bachelor of Arts

Statistics is the science of learning from data, measuring, controlling, and communicating uncertainty. It provides the navigation essential for controlling the course of scientific and societal advances.

The statistical practice BA is intended for students who want to use their education as certification for work requiring statistical skills or as a basis for further education in another area like medicine, psychology, law or others. Compared to the BS degree, this program reduces the number of required mathematics courses and increases the number of applied statistics courses, or courses in a supporting quantitative area. Students who complete this program using statistics electives will have applied statistics training equivalent to most masters programs in statistics.

Program Delivery

This program is available:

- via classroom (the majority of instruction is face-to-face)

Admission Requirements

Students must complete 1 courses before admission to the program.

For information about University of Minnesota admission requirements, visit the Office of Admissions website.

Required prerequisites

Preparatory Course

Complete STAT 3011 or STAT 3021 with a grade of C- or better in order to declare the statistical practice BA program.
STAT 3011 - Introduction to Statistical Analysis [MATH] (4.0 cr)
or STAT 3021 - Introduction to Probability and Statistics (3.0 cr)

General Requirements

All students are required to complete general University and college requirements including writing and liberal education courses. For more information about University-wide requirements, see the liberal education requirements.Required courses for the major or minor in which a student receives a D grade (with or without plus or minus) do not count toward the major or minor (including transfer courses).

Program Requirements

Students are required to take 4 semester(s) of any second language.

CLA BA degrees require 4 semesters or the equivalent of a second language.

All CLA BA degrees require 18 upper-division (3xxx-level or higher) credits outside the major designator. These credits must be taken in designators different from the major designator and cannot include courses that are cross-listed with the major designator. The major designator for the Statistical Practice BA is STAT.

Students may earn no more than one degree from the statistics program: a BA or a BS or a minor.

All incoming CLA freshmen must complete the First Year Experience course sequence.

Calculus

Take 2 courses for a total of 8 credits.
MATH 1271 - Calculus I [MATH] (4.0 cr)
or MATH 1371 - CSE Calculus I [MATH] (4.0 cr)
or MATH 1571H - Honors Calculus I [MATH] (4.0 cr)
MATH 1272 - Calculus II (4.0 cr)

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.

or MATH 1372 - CSE Calculus II (4.0 cr)
or MATH 1572H - Honors Calculus II (4.0 cr)

Programming for Statisticians
Take 1 of the following courses for 4 credits.
CSCI 1113 - Introduction to C/C++ Programming for Scientists and Engineers (4.0 cr)
or CSCI 2021 - Machine Architecture and Organization (4.0 cr)

Major Courses
Take 6 courses for a total of 23 credits.
STAT 3032 - Regression and Correlated Data (4.0 cr)
STAT 3701 - Introduction to Statistical Computing (4.0 cr)
STAT 4051 - Statistical Machine Learning I (4.0 cr)
STAT 4052 - Statistical Machine Learning II (4.0 cr)
Choose 1 Theory of Statistics 2-course sequence. Note: Students interested in the BA/MS in Biostatistics sub-plan should complete STAT 4101/4102 or STAT 5101/5102. In order to apply for admission to the sub-plan, these courses should be completed with a B or higher by the end of a student's 3rd year in the BA degree.
Option 1
STAT 4101 - Theory of Statistics I (4.0 cr)
STAT 4102 - Theory of Statistics II (4.0 cr)
or **Option 2**
Note: These courses require MATH 2263 or MATH 2374 as a prerequisite.
STAT 5101 - Theory of Statistics I (4.0 cr)
STAT 5102 - Theory of Statistics II (4.0 cr)
or **Option 3**
Note: These courses require MATH 2263 or MATH 2374 as a prerequisite.
MATH 5651 - Basic Theory of Probability and Statistics (4.0 cr)
STAT 5102 - Theory of Statistics II (4.0 cr)

Electives
Take a total of 11 credits, at least 5 of which must be listed below as STAT Electives. Students planning to pursue a minor in mathematics, or an advanced degree in statistics or biostatistics should consult the undergraduate adviser for suggested coursework.
Take 11 or more credit(s) from the following:
STAT Electives
Take 5 or more credit(s) from the following:
•STAT 3501 *{Inactive}*(1.0 cr)
•STAT 5031 *{Inactive}*(4.0 cr)
•STAT 5201 - Sampling Methodology in Finite Populations (3.0 cr)
•STAT 5401 - Applied Multivariate Methods (3.0 cr)
•STAT 5421 - Analysis of Categorical Data (3.0 cr)
•STAT 5511 - Time Series Analysis (3.0 cr)
•STAT 5601 - Nonparametric Methods (3.0 cr)
•STAT 5931 - Topics in Statistics (3.0 cr)
•Other Electives
Take at most 6 credit(s) from the following:
•CSCI 2011 - Discrete Structures of Computer Science (4.0 cr)
•CSCI 2011H - Honors Discrete Structures of Computer Science (4.0 cr)
•CSCI 2021 - Machine Architecture and Organization (4.0 cr)
•CSCI 2041 - Advanced Programming Principles (4.0 cr)
•CSCI 3003 - Introduction to Computing in Biology (3.0 cr)
•CSCI 3081W - Program Design and Development [WI] (4.0 cr)
•CSCI 4011 - Formal Languages and Automata Theory (4.0 cr)
•CSCI 4041 - Algorithms and Data Structures (4.0 cr)
•CSCI 4041H *{Inactive}*(4.0 cr)
•CSCI 4061 - Introduction to Operating Systems (4.0 cr)
•CSCI 4131 - Internet Programming (3.0 cr)
•CSCI 4211 - Introduction to Computer Networks (3.0 cr)
•CSCI 4511W - Introduction to Artificial Intelligence [WI] (4.0 cr)
•CSCI 4611 - Programming Interactive Computer Graphics and Games (3.0 cr)
•CSCI 4707 - Practice of Database Systems (3.0 cr)
•CSCI 4950 - Senior Software Project (3.0 cr)
•CSCI 4970W - Advanced Project Laboratory [WI] (3.0 cr)
•CSCI 5103 - Operating Systems (3.0 cr)
•CSCI 5105 - Introduction to Distributed Systems (3.0 cr)
•CSCI 5106 - Programming Languages (3.0 cr)
•CSCI 5115 - User Interface Design, Implementation and Evaluation (3.0 cr)

Senior Project: Consultation and Communication for Statisticians

This course is required of all majors, including double-majors who have met the writing intensive requirement in the other major.
Take exactly 1 course(s) totaling exactly 3 credit(s) from the following:
- STAT 4893W - Consultation and Communication for Statisticians [WI] (3.0 cr)

Upper Division Writing Intensive within the major

Students are required to take one upper division writing intensive course within the major. If that requirement has not been satisfied within the core major requirements, students must choose one course from the following list. Some of these courses may also fulfill other major requirements.
Take 0 - 1 course(s) from the following:
- STAT 4893W - Consultation and Communication for Statisticians [WI] (3.0 cr)

Program Sub-plans

A sub-plan is not required for this program.

BA/MS Biostatistics

The College of Liberal Arts and the Division of Biostatistics of the School of Public Health offer an early-admission opportunity for eligible University of Minnesota Statistics BA and BS students also interested in completing the MS in Biostatistics.

Interested statistics undergraduates should contact the School of Statistics advisor for more information. Students should apply during the fall semester of their junior year, with the intent of beginning the program the fall of their senior year.

Students admitted to the MS in Biostatistics sub-plan must maintain timely degree progress to ensure all undergraduate degree requirements are completed by the end of their fourth year. Students who are not successful in completing the required SPH courses at the end of their senior year may be placed on probation or dismissed from SPH.

To be considered for admission to the joint program, prospective students must be officially admitted to an undergraduate major (BA or BS) in the School of Statistics in the College of Liberal Arts at the University of Minnesota. All prerequisite courses should be completed with a B or better by the end of a student's junior year. Students should apply during the fall semester of their junior year with the intent of beginning the program the fall of their senior year.

Admitted students will take 9 Biostatistics course credits in their senior year (year 4, undergraduate credit), which will be applied to their MS degree. They will also take the remainder of the courses required to complete the bachelor's degree. The year 4 Biostatistics courses include the core biostatistical methods courses (PubH 7405 and 7406, 8 credits total) and a course on Essential Skills for Biostatistical Practice (1 credit), which will teach students career development skills and "job-relevant" computing and communications skills.

Prerequisite Courses

© 2005 by the Regents of the University of Minnesota
The University of Minnesota is an equal opportunity educator and employer.
Information current as of March 29, 2024

All prerequisite courses should be completed with a B or better by the end of Year 3 in the BA degree. Many prerequisite courses are already required for the BA degree, but it is important for students planning to apply to the sub-plan that they be taken in a timely manner, while considering the grade standards for admission to the sub-plan.

Take 0 - 6 course(s) from the following:

Statistical Theory

Take 2 courses for a total of 8 credits. In rare cases, students may be permitted to take STAT 5101/5102, or STAT 4101/4102, during their senior year concurrently with the usual Year 4 joint BA/MS program requirements.

STAT 4101 - Theory of Statistics I (4.0 cr)
STAT 4102 - Theory of Statistics II (4.0 cr)
or STAT 5101 - Theory of Statistics I (4.0 cr)
STAT 5102 - Theory of Statistics II (4.0 cr)

•Calculus

Take 3 courses for a total of 12 credits.

MATH 1271 - Calculus I [MATH] (4.0 cr)
or MATH 1371 - CSE Calculus I [MATH] (4.0 cr)
or MATH 1571H - Honors Calculus I [MATH] (4.0 cr)
MATH 1272 - Calculus II (4.0 cr)
or MATH 1372 - CSE Calculus II (4.0 cr)
or MATH 1572H - Honors Calculus II (4.0 cr)
MATH 2263 - Multivariable Calculus (4.0 cr)
or MATH 2374 - CSE Multivariable Calculus and Vector Analysis (4.0 cr)
or MATH 2573H - Honors Calculus III (4.0 cr)

•Linear Algebra

Take 1 course for 4 credits.

•CSCI 2033 - Elementary Computational Linear Algebra (4.0 cr)
or MATH 2243 - Linear Algebra and Differential Equations (4.0 cr)
or MATH 2373 - CSE Linear Algebra and Differential Equations (4.0 cr)
or MATH 4242 - Applied Linear Algebra (4.0 cr)

•Statistical Programming

Experience in basic programming is strongly recommended; exposure to programming in a statistical software package (R or SAS) is preferred.

Year 4 Courses

The following courses should be taken during the 4th year of a student's BA degree, in addition to the other courses required to complete the BA.

Take PUBH 6460 and PUBH 7405 for a total of 5 credits during Fall of Year 4.

PUBH 6460 *{Inactive}*(1.0 cr)
PUBH 7405 - Biostatistical Inference I (4.0 cr)

Take PUBH 7406 for 4 credits during Spring of Year 4.

PUBH 7406 - Biostatistical Inference II (3.0 cr)
