College of Design

- Program Type: Baccalaureate
- Requirements for this program are current for Summer 2017
- Required credits to graduate with this degree: 120

- Degree: Bachelor of Science

The Product Design program is a creative, interdisciplinary major that blends elements of design, engineering, business, and humanities. This program provides methods and tools for inventing our future in the form of innovative objects, systems, and services. In addition to design fundamentals, this program is strengthened by the sciences. Combining these disciplines allows students to design desirable products and services (both physical and digital) that are also functional, marketable, and human-centered. This program enables students to take ideas from concept to reality and succeed in market.

Program Delivery
This program is available:
- via classroom (the majority of instruction is face-to-face)
