Public Health Minor

Geography, Environment, Society, Sociology

College of Liberal Arts

- Program Type: Undergraduate free-standing minor
- Requirements for this program are current for Fall 2019
- Required credits in this minor: 14 to 16

Protecting the public's health requires addressing challenges that are influenced as much by individual and social behavior as they are by biology, chemistry, and physics. Biology, the environment, social and political systems, technology, and more intersect to describe the methods of protecting the health and well-being of the population. Liberal arts students, and students from other colleges who complement their major degree programs with a public health minor, will understand how to help society by improving health and preventing disease on a population level.

Program Delivery

This program is available:

- via classroom (the majority of instruction is face-to-face)

Minor Requirements

Transfer coursework from outside the UMN-TC must be reviewed and approved by the Public Health Advisory Board.

Students may combine the minor in public health with any other major or minor.
