- Program Type: Master's
- Requirements for this program are current for Fall 2019
- Length of program in credits: 34
- This program does not require summer semesters for timely completion.
- Degree: Master of Science

Along with the program-specific requirements listed below, please read the [General Information](#) section of the catalog website for requirements that apply to all major fields.

Note: Students are not admitted directly into the master's program; it is available only by special arrangement with the program.

Students prepare for careers in biomedical research and teaching by completing broad training in molecular biology or biological sciences, and focused specialization in one of three concentrations (microbiology, immunology, or cancer biology). The program offers exceptional research opportunities for graduate training in autoimmunity, biotechnology, cancer biology and therapy, environmental microbiology, genetic engineering of microorganisms, lymphocyte activation and development, microbial pathogenesis, molecular genetics of disease, tumor immunology, vaccine development, and vascular biology and inflammation.

Program Delivery

This program is available:

- via classroom (the majority of instruction is face-to-face)

Prerequisites for Admission

Applicants must have a bachelor's degree (BS preferred).

International applicants must submit score(s) from one of the following tests:

- TOEFL
 - Internet Based - Total Score: 96
 - Paper Based - Total Score: 600
- IELTS
 - Total Score: 7
- MELAB
 - Final score: 85

For an online application or for more information about graduate education admissions, see the [General Information](#) section of the catalog website.

Program Requirements

Plan A: Plan A requires 24 major credits, up to null credits outside the major, and 10 thesis credits. The final exam is written and oral.

This program may not be completed with a minor.

Use of 4xxx courses toward program requirements is permitted under certain conditions with adviser approval.

A minimum GPA of 3.00 is required for students to remain in good standing.

At least 2 semesters must be completed before filing a Degree Program Form.

During the first year of study, students will identify an advisor through completing laboratory rotations, select a focus area, and initiate thesis research. Students also must complete an ethics seminar and responsible conduct of research course their first year in the program.

All coursework must be taken for an A/F grade and completed with a minimum grade of C, unless the course is only offered for an S/N grade.

No more than one 4xxx-level elective course can be applied to this degree.

Core Coursework (4 credits)

Take one of the following 4-credit core courses in consultation with the advisor. Although only one of the 3 courses is required, taking all 3 is strongly encouraged. If students take more than one of these courses, the additional course(s) will count towards the elective coursework requirement.

[MICA 8002](#) - Structure, Function, and Genetics of Bacteria and Viruses (4.0 cr)

[MICA 8003](#) - Immunity and Immunopathology (4.0 cr)

[MICA 8004](#) - Cellular and Cancer Biology (4.0 cr)

Required Coursework (4 credits)

Take both of the following courses. Take MICA 8094 twice (fall and spring semester of the first year) for 2 credits.

[MICA 8012](#) - Writing and Reviewing a Research Proposal (2.0 cr)

[MICA 8094](#) - Research in Microbiology, Immunology, and Cancer Biology (1.0 cr)

Practicum and Seminar Coursework

Take all of the following courses. Take MICA 8910 4 times; and MICA 8920 4 times.

[MICA 5000](#) - Practicum: Teaching (0.0 cr)

[MICA 8910](#) - Seminar: Faculty Research Topics (0.0 cr)

[MICA 8920](#) - Seminar: Student Research Topics (0.0 cr)

Elective Coursework

Select electives, in consultation with the advisor, to complete the 24 course credits required. Use of 4xxx- and 5xxx-level courses is restricted to either two 5-level courses or one 4- and one 5-level course.
